

Happy New Year from Sundance

January 1, 2012

To our customers, neighbors, and friends,

We appreciate you and wish you and your family a very **Happy and Healthy New Year!**

We would also like to remind you to please **protect your investment** in your landscaping. While we have had a fair amount of early snowfall, your trees, shrubs, perennials, and lawn (especially anything planted in the last 2 years) need water to survive. The rule of thumb is that if they are not covered with a protective blanket of snow and the temperature is above 40 degrees you should drag out the hoses and deep water. For more information from a CSU Extension Fact Sheet please [click here](#).

We greatly appreciate your support of Sundance Gardens and Landscaping and our expansion last season of **Sundance by Design**. If you haven't already visited our new Annex in the Evergreen Design Center we look forward to showing you around this spring. Weather permitting the Garden Center and Sundance by Design will re-open in March.

We look forward to serving you in 2012,

The Sundance Team
